Description

VISUAL AND TASTE SENSATIONS

Gran caffè in grani is an Espresso with a delicate, streaky, narrow-meshed cream. Friar's tunic color, amber and not dark brown or black. It should be served in a hot but not boiling cup

Espresso of important personality. Great body. Strong flavor but not hard and with a persistent aftertaste. Naturally sweet. Delicately aromatic: the initial notes of chocolate dissolve in a light scent of ripe citrus fruits.

Blend of naturally roasted "SWEET" coffee beans, made up of 7 types of Central American, Asian and African Arabica coffees.

Sales unit : 1 kg bags with nitrogen and with aroma-saving valve – Duetto BLUE colour.

Gran Caffè Duetto is coffee beans with a very low natural percentage of caffeine and a very high number (about 700) of other healthy components, such as Omega 3, antioxidants, mineral salts, proteins, etc. Like all Dolce coffees:

- it is a friend of the heart and lungs, because it has a cardiotonic action and reduces asthma;
- enhances memory and learning and relieves headaches;
- it is an ally in the diet, because it helps control appetite and has diuretic effects;
- it is a support for the nervous system, because it improves its psychomotor performance, resistance to sleep and fatigue;
- With antioxidants, it helps slow down the aging process of cells.

A healthy subject can also take up to 5 cups a DAY.
